

CONTENTS

INTRODUCTION	10
Parts of a Llama	
1. BUYING A LLAMA OR ALPACA	13
Purpose of the animal·Sex·Age·Personal preference·Researching farms and animals·Buyer's exam of the llama·Warranties and contracts·Veterinary pre-purchase exam	
2. CONCERNS OF TRAVELING	19
State health requirements·Vehicles for transportation	
3. RESTRAINT	23
Babies·Halters·Knots·Cross tying·Chutes	
4. NUTRITION	33
Water·Energy·Protein·Minerals·Vitamins·Guidelines for feeding·Determining ideal llama or alpaca condition	
5. HERD HEALTH	41
Records·Nutrition·Parasite control·Immunization programs·General disease control and prevention	
6. TEETH	53
Normal dentition·Fighting teeth and their removal·Tooth infection·Missing teeth	
7. EYES	57
Normal eyes·General signs of eye problems·Eyelid injuries·Conjunctival injuries and infections·Eyeball injuries and ulcers·Behavioral eyelid oddities·Troubleshooting eye problems chart	
8. WOUNDS	63
Open wound care·Puncture wounds·Abrasions·Bruises·Burns·Troubleshooting Chart	
9. LUMPS AND BUMPS	69
Normal bumps·Scar tissue·Swelling·Allergies·Tumors·Abscesses	
10. SKIN DISORDERS	73
Hair loss·Mange·Lice·Allergies·Zinc responsive skin disease	
11. LAMENESS	75
Normal anatomy·Toenail trimming·Pads·Joint and leg problems·Fractures	

12. HEAT AND COLD PROBLEMS	85
Hyperthermia·Hypothermia	
13. RESPIRATORY PROBLEMS	89
Normal respiration·Upper airway infections·Upper airway irritation and allergies·Sinus·Pneumonia·General advice for llamas with signs of respiratory illness·Choanal atresia·Ventilation	
14. DIGESTIVE PROBLEMS	91
Normal digestion·Salivation·Diarrhea·Constipation and impaction	
15. THE DOWN LLAMA OR ALPACA	95
Normal behavior·Colic·Injury·Paralysis·Transporting the “down” llama and alpaca·Troubleshooting chart	
16. REPRODUCTION.....	99
Male: Normal anatomy·Normal breeding behavior·Female: Normal anatomy·Puberty·Choosing a mate·Methods of breeding·Normal breeding·Pregnancy diagnosis·Infertility and abortion·Stages of normal parturition·Newborns·Dystocia·Troubleshooting dystocias	
17. NEWBORN LLAMAS AND ALPACAS.....	119
Breathing·Umbilicus·Temperature and weight·Standing·Nursing·Premature baby·Urination and defecation·Crooked legs and floppy ears·Normal behavior·Troubleshooting chart	
18. MASTITIS	123
Subclinical·Subacute·Acute·Peracute·Diagnosis·Treatment·Prevention	
19. THE AGING LLAMA OR ALPACA	127
Musculoskeletal changes·Temperature extremes·Vision and hearing·Digestion and nutrition·Immunity·General organ dysfunction	
20. HOW TO GIVE INJECTIONS	131
General rules·Intramuscular injections·Subcutaneous injections·Collecting blood sample	
21. PASSING A STOMACH TUBE	139
Indications and cautions·Baby llamas·Adult llamas·Correct placement	
22. TAKING A TEMPERATURE	145
23. APPENDIX.....	147
Normal values in llamas and alpacas·Measurement equivalents·Supplies·Restraint chutes·Congenital defects·Poisonous plants·Fiber and Shearing·Feed Analysis	
INDEX	168

ILLUSTRATIONS

- Parts of a Llama, 9
- 1.1 Leg conformation; Sickie hocked; Cow hocked, 14
- 1.2 Ankles, 15
- 3.1 Proper fit of halter, 24
- 3.2 Square knot, 25
- 3.3 Bowline, 26
- 3.4 Quick release, 27
- 3.5 Clove hitch, 27
- 3.6 Lark's head, 28
- 3.7 Cross tie, 28
- 3.8 Chute, 30
- 3.9 Chute, 31
- 3.10 Llama in stanchion, 32
- 4.1 Llama condition- thighs, 38
- 4.2 Llama condition- chest, 38
- 4.3 Llama condition- back, 39
- 6.1 Normal teeth, 53
- 6.2 Fighting teeth removal, 55
- 6.3 Tooth root abscess, 56
- 7.1 Normal eye, 57
- 7.2 Abnormal eye, 58
- 7.3 Flushing out the eye, 59
- 7.4 Non-cosmetic results of uncorrected eyelid injury, 59
- 7.5 Applying eye ointment, 60
- 8.1 Bandaging, 64
- 11.1 Normal feet, 75
- 11.2 Normal pad, 75
- 11.3 Long toenails, 75
- 11.4 Toenail trimming without artificial aid, 76
- 11.5 Picking up feet for toenail trimming (4 diagrams), 77,78,79
- 11.6 Trimming toenails, 80,81
- 11.7 Dropped ankles, 82
- 14.1 Stance of an ill llama, 94
- 16.1 Normal male external genitalia, 99
- 16.2 Normal breeding position, 100
- 16.3 Normal female external genitalia, 105
- 16.4 Enlarging teats with impending parturition, 110
- 16.5 Normal Parturition, 111,112,113
- 16.6 Direction of joint flexation, 115
- 18.1 Mastitis, 123
- 19.1 Older llama over at the knee, 128
- 19.2 Older llama unable pr unwilling to raise neck, 130
- 20.1 Parts of a syringe and needle, 131
- 20.2 Filling a syringe, 132, 133
- 20.3 Sites of IM and SQ injections, 134
- 20.4 Giving an IM injection, 135
- 20.5 Giving an SQ injection, 136
- 20.6 Collecting blood sample from tail vein, 137
- 21.1 Passing stomach tube on a baby llama, 140
- 21.2 Measuring length of stomach tube, 141
- 21.3 Passing stomach tube on adult llama, 142
- 21.4 Feeling for correct placement of tube, 143
- 21.5 Administering medicine via stomach tube, 144
- 22.1 Taking a rectal temperature, 146
